Great Jim, I don't believe that I know Teena, is she with EPA, what does she work on?

Hi Heather: It would be nice to see you. You may also see Teena Reichgott, as she plans to be visiting that day too. Jim

Hi Jim, thanks a lot for the heads up. Yes, I do plan to do that. I am glad you reached out, because one of the things on my list of things to do was to reach out to you, to verify that you were aware of my trip. I will be in the opps office on Monday morning, the 28th, too. Maybe I will have a chance to say hi to you while there?

Thanks Jim

Eastern Michaud Flats/FMC Operable Unit (near Pocatello, ID): On September 21st, Region 10 staff will attend a presentation by Argonne National Labs to the Fort Hall Business Council related to their independent review of elemental phosphorus excavation and treatment technologies. They were commissioned to conduct the review by EPA HQ to address continuing concerns from the Shoshone-Bannock Tribes regarding the interim remedy selected for the FMC Operable Unit.
